University of Ilorin

Bachelor of Arts English Language

Ilorin, Kwara State, Nigeria
Dec 2022

EXPERIENCE

Chronos Bridge

Lead Product Manager

Nigeria (Remote)
2024-05 — 2026-05

- Led and managed a 13-person cross-functional team of engineers, product managers, and support staff across concurrent client engagements, owning delivery, day-to-day direction, and team development.
- Designed, managed development of, and shipped an automated fiat-to-stablecoin and stablecoin-to-fiat trading feature enabling standing instructions on dormant liquidity for continuous on-chain execution, with multi-chain awareness across Ethereum, Base, and Solana, with liquidity management supporting trade fulfillment growing P2P market business revenue by 12%+ and increased trades on the platform by 67% in the first quarter of release
- Shipped a remittance product handling \$5M in volume across several African corridors, translating regulatory and settlement complexity into intuitive flows for business users; delivered Web3 products spanning wallet integrations and on-chain flows, bridging protocol-level constraints and consumer-facing UX.
- Led business strategy alongside leadership, scoping and pricing engagements, defining the product service offering, and advising clients on positioning and go-to-market.
- Defined product direction across B2B and B2C products in the portfolio, working closely with businesses, partners, and merchants to shape integrations and distribution tooling.
- Delivered product for over a dozen client engagements spanning Web3, AI, SaaS, and cross-border remittance, owning discovery, scoping, and roadmap from brief to launch in a fast-paced, multi-client environment.
- Acted as primary product interface for clients and technical stakeholders, translating business requirements into technical specs, aligning engineering, design, and client teams, and defining KPIs, success metrics, and analytics instrumentation per engagement to guide prioritization and post-launch iteration.

GetPaid Technologies Limited

Product Manager

Lagos, Nigeria.
2025-01 - 2025-10

- Owned the end-to-end product roadmap across agency and merchant acquiring, business banking, embedded finance, and card issuance, ensuring alignment between user needs, business goals, and partner requirements.
- Planned and executed system-wide optimizations of PSP integrations and merchant dashboards, improving platform stability, increasing transaction success rate by 34%, optimizing failovers and requeries, and updating fraud prevention processes; reduced operational escalations and sustained 15%+ MoM growth in collections for Q3–Q4 2025.
- Owned technical and operational coordination with acquiring banks and payment processors, monitoring acceptance rates, settlement SLAs, chargebacks, and compliance, ensuring transaction reliability and regulatory adherence.
- Launched and onboarded merchants on Instant Settlement, eliminating T+1 delays and boosting merchant activeness and transaction volume, driving double-digit MoM growth.
- Designed and implemented the geotagging and geofencing compliance requirement, collaborating with processors to ensure real-time transmission of transaction locations in compliance with CBN policies.

Helprout

Product Manager

Nigeria (Remote)
2024-05 - 2025-06

- Led the full product lifecycle from system discovery to delivery for core support modules, ensuring alignment with the needs of support and customer experience teams.
- Conducted user research, usability tests, and stakeholder interviews to continuously refine the product roadmap and prioritize features based on impact and feasibility.
- Authored and maintained product documentation, including PRDs, user stories, release notes, and integration guides to support both development and customer success teams.
- Drove third-party integrations research and selection, tested APIs for compatibility to expand support channels' reliability, ensuring 100% inbound and outbound real-time message delivery.

Zap Africa

Product Manager

Lagos, Nigeria (Remote)
2023-12 - 2024-07

- Managed the lifecycle of the Zap Exchange platform (web and mobile), driving over \$2M in transactions within the first year.

- Defined and led the development of an additional KYC-transaction feature, shortening the time between user acquisition and activation by an average of 60 seconds.
- Collaborated with marketing to set up proactive and reactive systems for customer support, improving general support efficiency by 43.3%.
- Laid the groundwork for Zap Wallet and Zap Business, introducing decentralized payment solutions and expanding the company’s blockchain-based product portfolio.

CPI TechnologiesChicago, US (Remote)

Technical Product Manager2022-03 - 2023-12

- Managed the development and delivery of an LMS for two universities to support online classes, tests, and exams during the pandemic, achieving a 95% service success rate.
- Collaborated with third-party providers and internal stakeholders to deliver high-quality digital solutions across several sectors, improving client satisfaction by 57%.

Don Dada TechnologiesIbadan, Nigeria

IT Manager & Instructor2019-10 to 2022-10

- Led end-to-end delivery of custom websites and web applications using PHP, SQL, and JavaScript, overseeing the entire development cycle and ensuring scalable builds tailored to client needs.
- Worked with QA to create test cases, perform regression tests, and validate features against requirements.
- Handled technical infrastructure setup on cPanel or dedicated VPS servers, including on-site server deployments, networking, and ensuring optimal system performance for clients with complex operational environments.
